• Front end developer •

## ABOUT ME

Front end developer in constant search for improvement through mentorship, self-taught studies and practice with knowledge in agile methodologies and a certification (PSM I) from Scrum.org.

In order to improve my technical knowledge in development I choose a project where I can use a feature I am interested to learn and define a deadline to finish it.

Having selected the project I also separate time daily to study this new feature and to practice it even on weekends always publishing my projects in my github profile as I advance.

Doing this, besides improving my skills, I also improve on estimating the time I will take to deliver a project and how to better manage this time to be more productive.

I am interested in new professional challenges where I can be a part of a team and create solutions.

Please, feel free to reach out to me through my linkedIn or e-mail.
